Wacken P

With a total breeding value (GZW) of 141, Wacken P is our highest-ranking Fleckvieh bull, and this well-muscled, correctly built bull stands out with a very balanced heritability profile. With an Austrian breeding value (ÖZW) of 138, Wacken P is clearly impressive in this regard as well.

++ Wacken P promises daughters with good milk yield and neutral heritability for milk components. Persistence is at a good level, and the fertility of his offspring is a highlight of his genetic potential—FRW 119.

++ With a fitness breeding value of 128, his outstanding udder health, resistance to mastitis, and low somatic cell count are particularly noteworthy—along with average milkability. The easy calving process is also a clear advantage.

++ The linear profile suggests medium-sized offspring with a slightly sloping pelvis and correct legs and feet. The udders are impressive due to their high attachment; when mating, it is recommended to use him on cows with longer teats.

++ Meat performance is at a high level with FW 119.
