Mallorca

MALLORCA is a very shapely bull and comes from a dam line that is characterized by very framed cows with strong udders with high production and very good feet & legs. Mallorca's hereditary profile convinces with excellent production transmission in combination with good fitness traits and decent beef index with high gains. The very good milking speed with good udder health is outstanding. In terms of conformation, we expect very large-framed offspring with wide rumps, correct feet and legs and firmly attached, long-attached udders. The calving ease is average, the maternal calving process is assessed as very favourable.
