Halentin P

Halentin P is a perfect type bull with an overall breeding value of 134. The hereditary profile is characterized by a very high milk production with slightly lower components (plus beta-casein A2/A2) in connection with good fitness values and very easy births. The meat output also comes into its own with 115 FW. In terms of conformation, we expect large-framed animals with optimally sloped rumps, completely correct feet and legs and long attached udders with somewhat shorter teats. With 129 ÖZW, Halentin P is also a high candidate for organic farms.

## Linear

Merkmal	ZW	Tendenz	88	112	124	Tendenz
Height at cross	110	small				large
Body length	108	short				long
