Pull PP from the Laundl breeding farm is an excellent homozygous polled sire with no weaknesses. Pull transmits a solid production and is one of the three highest PP fitness sires (FIT118) on the market due to exceptionally good values for longevity, udder health and daughter fertility. He also passes on a very good conformation with a lot of frame, good muscles and high, firm udders with longer teats. With an ÖZW of 119, he is also one of the highest PP sires for this breeding value.

## Linear

Merkmal	ZW	Tendenz	88	112	124	Tendenz
Height at cross	98	small				large
Body length	108	short				long
