Heeb's Domino PP Red

Domino PP Red remains one of the highest PP sires in Switzerland and comes from the Roxy family. He goes back to the show and breeding icon Scientific Debutante Rae EX 92 via a very interesting sire succession. With 1.449 kg of milk and high components, Domino PP Red has 129 kg of fat/protein. He combines this with very good fitness values, easy births (119 in conjunction with a mat. calving ease of 128) and a functional conformation with an average size, slightly sloping pelvis, perfectly angled hind legs and udders suitable for robots with long teats.
