SHA Lemur PP

Lemur PP goes back to the very influential Larcrest Champagne EX-90 (dam by Cosmopolitan) via the top sire Luster P. Lemur PP promises offspring with high components, excellent milkability, good fitness values, very high longevity and good daughter fertility as well as conformation with wide, slightly sloping rumps, parallel, perfectly angled hind legs and excellent movement. The high and firmly attached udders have longer, centrally placed teats. Lemur PP makes easy births and tests A2A2.
