Horst PP

Horst PP RF is a homozygous polled sire from a proven and internationally successful cow family with various bulls in AI. Among other things, his UGM Britania is a full sister of the Canadian sire of sons Swissbec Brekem RC. Horst himself is one of the top German PP performance sires with and is the only one with an excellent daughter fertility of 112 RZR. In addition, he passes on excellent milkability with an average cell count, as well as a solid conformation with good feet and legs and udder transmission and slightly sloping rumps. Horst is well suited for heifer insemination and one of the two highest polled red factor carriers in Germany without Solitair and Mission in his pedigree.

## Linear

Merkmal	ZW	Tendenz	88	112	124	Tendenz
Stature	108	small				tall
Rip structure	98	tight rib				open rib
Body depth	100	shallow				deep
Strength	89	frail				strong
Rump angle	98	high pins				sloped
Thurl width	84	narrow				wide
Rear legs side view	101	posty				sickled
Foot angle	89	flat				steep
Hock quality	113	coarse				dry
Rear legs rear view	95	hocked in				parallel
Front feet orientation	97	hocked in				parallel
Locomotion	100	poor				good
Rear udder height	106	deep				high
Udder cleft	95	weak				strong
Front teat placement	87	wide				close
Rear teat placement	114	wide				close
Fore udder attachment	106	loose				strong
Udder balance	120	ht				vt
Udder depth	112	deep				high
Teat length	88	short				long
