3GM: RR Shottle Elisa EX-90

RR Calvados

RR Calvados - like his half brother Montana - goes back to the Snowman dam Broeks MBM Elsa EX-90 via Germany's Cow of the Year 2018 RR Shottle Elisa EX-90. Following the potential of the cow family, his dam RR Elanie was already classified with 86 points and started lactation with high production and high components. With his hereditary profile, Calvados himself promises offspring with very good production with high fat and positive protein content, a very attractive conformation with excellent feet and legs and high attached udders with perfect teat placement, as well as high fitness and health values, with good udder health and very good milkability in particular stands out. Calvados tests beta-casein A2A2.
