Bogner PP

Bogner PP from the Behrens/Detjen breeders' association is one of the highest PP sires of his crop and comes from the successful family of ZT Balisto Elaine. Bogner himself passes on high milk production, very good udder health, high longevity and good daughter fertility. His health values are outstanding, whereby he is still among the top 10 PP sires according to RZhealth (124) and also inherits very good calf fitness (107). His daughters will be somewhat smaller, but powerful and have wider rumps, good feet & legs and udders with longer teats. This also suits Bogner himself, who has a rare aAa classification of 354. If you don't want cows that are too big, powerful, healthy and naturally hornless, Bogner is the right choice. He can also be used very well on heifers.
