TWH Spike PP Red

Spike PP Red is a Sandro P son from a high-performing cow family that has impressed with high components for many generations. His sire line makes him particularly interesting for Red Holstein breeding, as apart from Solitair, only black-and-white bulls with illustrious names appear.

His hereditary profile shows great balance. Spike PP Red combines good milk quantities with clearly positive components and beta-casein A2/A2. The uncomplicated calving process also qualifies him for a wide range of heifer applications.

With a high RZGesund, favorable cell counts, and pronounced persistence, Spike PP Red also impresses in the fitness area. In terms of conformation, he scores with a balanced linear rating: wide, stable pelvis; correct, functional feet and legs with ideal hind leg angulation and high hocks; as well as high-set udders with strong central ligaments. All of this points to a long productive life and functionality in his offspring.

Linear

Merkmal	ZW	Tendenz	88	112	124	Tendenz
