TWH Spike PP Red

Spike PP Red is Sandro P's son and comes from a family of cows that has shined with high components over many generations. The sire stack makes him particularly interesting for Red Holstein breeding, since apart from Solitair only black and white bulls with illustrious names appear. The transmission profile shows Spike PP Red as a very balanced sire who has good milk yield with clearly positive components (plus beta-casein A2/A2). The breeding value of calving ease indicates that he is suitable for heifer insemination. With 121 RZhealthy, 116 somatic cell count and 111 persistence, Spike PP Red is also convincing in the fitness area. The RZE of 127 makes him one of the highest homozygous polled bulls for conformation; wide rumps with a suitable structure, functional feet and legs with optimal angulation of the hind legs and high heels as well as high attached udders with a strong central ligament characterize the linear profile and indicate a high functionality of the offspring.
