TWH Felix PP

FELIX PP is a son of Freewood P and on his mother's side he comes from the cow family of the multiple bull dam De-Su BW Marshall Georgia EX 90. The heredity profile of Felix PP convinces with a good milk production with high components (plus the casein variants A2/A2 and BB). Combination with very good values for longevity, persistence and daughter fertility. Calving is average, as is milking speed. The remarkable RZGesund of 116 shows excellent values for Felix PP for hoof health and Mortellaro resistance (DDcontrol 120). In terms of conformation, slow maturing animals of smaller size are to be expected. The parallel set hind legs have a little more angle and the udders will be attached high and tight and the teats will be central.

Linear

Merkmal	ZW	Tendenz	88	112	124	Tendenz
Stature	96	small				tall
Rip structure	106	tight rib				open rib
Body depth	96	shallow				deep
