TWH Felix PP

FELIX PP is a son of Freewood P and comes from the cow family of the multiple bull dam De-Su BW Marshall Georgia EX 90 on his dam's side. Felix PP's hereditary profile convinces with a good milk production with high components (plus the casein variants A2/A2 and BB) in combination with very good values for longevity, persistency and daughter fertility. In addition, Felix PP has excellent health values, with 124 DDcontrol making him the No. 1 for Mortellaro resistance and No. 2 PP sire in Germany for hoof health. For conformation, late-maturing animals with less size are to be expected. The parallel hind legs have slightly more angles and the udders will be high and tightly attached and the teats are placed in the middle.
