Redwood Red

Redwood from the Kamerhuis breeding farm is a cracker for Holstein breeding. As the only son of the Dutch sire Refine Red and subsequently a pure sbt. As the only son of the Dutch sire Refine Red and subsequently a pure BW sire line, which goes back to the internationally very successful family of Willem's Hoeve Ritass, he is suitable for many matings in red and white breeding. No other sire combines such high milk production with extraordinary fitness and health values as Redwood. He convinces in all areas with outstanding daughter fertility, high longevity, all health values as well as calf fitness and calving traits. It is therefore not surprising that he is also one of the highest sires in the country according to RZÖko. His conformation is also impressive with slightly sloping rumps, good feet & legs and AMS suitable, high attached udders with longer teats. As Redwood does not come from ET, he is also suitable for Demeter farms.
