Riomax P Red

Riomax P Red is one of the highest P - sires after RZ€ in Germany and goes back to the Roxy family via an alternative sire sequence. He is an exceptional production sire who combines high milk yield with high components - plus beta-casein A2/A2 - and excellent persistency (121). In addition, he has very good milkability with good udder health and overall excellent health values (121 RZGesund). The easy births are just as noteworthy as the very high RZÖko of 145, which makes him an absolute top sire in this segment.
Riomax Red will produce late-maturing animals with wide, slightly sloping rumps and functional feet & legs. In the udder area, he can be seen as a bull for equalizing matings, promising longer teats, a wider teat placement and an average udder balance.

Linear

Merkmal	ZW	Tendenz	88	112	124	Tendenz
