Bangkok

Bangkok transmits very high milk components with solid milk production and good daughter fertility. The first milking daughters please as medium-framed freestall cows with a firm top line, very correct feet and legs with parallel rear legs and tightly attached, well-planted udders. The young cows start with approx. 35 kg milk - with good milkability and average cell count (despite low RZS). Bangkok is not from ET and is suitable for heifer insemination.

## Linear

Merkmal	ZW	Tendenz	88	112	124	Tendenz
Stature	88	small				tall
Rip structure	101	tight rib				open rib
