HOR Bolero Red

Bolero Red has been at a high level for years and is by far the oldest bull among the top 10 daughter-proven Rbt. sires in Germany and also in Poland, where he was used a lot, he is among the top 5 of the top list . Bolero has an alternative pedigree for Red Holstein breeding and inherits high production with excellent protein values. In addition, he convinces with very good daughter fertility, a decent longevity and a functional conformation with very good feet and legs inheritance. Bolero is good for heifer insemination and tests beta-casein A2/A2. The daughters who have calved in the meantime show the expected willingness to perform with very good milkability (according to reports from practice) and have an conformation that leaves nothing to be desired, as a prime example the Bolero - daughter IHC Bonni Tyler VG 85 (84/86/84 /86) as third in class at the RSH - Show in Neumünster convinced! The daughters are now in their second lactation and have developed into strong, wide and open bodied, hard working, milking cows.
