Dreamer Red

Dreamer Red is No. 6 according to RZG of the daughter proven Red Holsteins in Germany. With 106 kg fat/protein and 139 RZM, he takes 2nd place in the area of production transmission. He is one of the few who, in addition to a very high milk yield, also tests positive for the components, which is not entirely surprising since his mother has meanwhile produced over 50,000 kg of milk with high components. Without Salvatore, Pat Red and Gywer in his pedigree, he is an attractive option for the numerous offspring of these sires in Red Holstein breeding. In addition to an excellent performance, he convinces with very good udder transmission and high fitness values with good udder health, positive milkability and longevity. Dreamer is suitable for heifer insemination and with a RZRobot of 106 also for AMS farms. He tests A2/A2 and is not from ET.
