Body Composite	98
Feet & Legs	87
Udder	110

Dreamer Red is one of the highest progeny tested bulls of his year of birth. With +99 kg fat/protein and 127 RZM, he occupies a leading position in the area of production inheritance. He is one of the few who, in addition to a still high milk production, also tests positive for components, which is not entirely surprising as his dam has now produced over 50,000 kg of milk with high components. Without Salvatore, Pat Red and Gywer in his pedigree, he is an attractive option for the numerous offspring of these sires in red and white breeding. In addition to outstanding performance, he convinces with very good udder inheritance and high fitness values with good udder health, positive milkability and high longevity. Dreamer is suitable for heifer inseminations and with an RZRobot of 103 also for AMS farms. He tests A2/A2 and is not out of ET.

Mutter: Bellevue VG-85
