4GM: CEH Melli VG-88

Alex Arkink

CEH Preco

Preco, a son of Pine-Tree-I Pursuit (s. Imax), who is the former daughter proven No. 1 by TPI in the USA, descends from the Rudy Missy family on both the father's and the mother's side with 10 generations of EX and VG and has a very modern transmission profile with good performance at high components and a very good conformation with a lot of strength (dairy strength), wide rumps, very functional feet and legs with parallel leg position, optimal hind leg angle and high heels, as well as high attached udders with longer, centrally placed teats (robot udder). Preco combines these advantages with excellent health and fitness values. He is particularly convincing in the traits that are important for longevity, udder health, daughter fertility and metabolic stability.
