HGH Stan

Stan from the Hehmann-Gerdom-Holsteins breeding farm is a son of the performance specialist Sunrise and goes back over 10 generations of VG and EX on the dam's side to the Rudy Missy EX-92 family. His granddam CEH Melody EX-91 is a highly successful bull dam who has tested well in various systems and his dam, already classified VG-87, is, like the entire dam line, an outstanding performance cow. In addition to high production with very good persistency, Stan himself convinces with a very complete profile with good fitness and health values. Stan also passes on good conformation with strengths in the body with wide, slightly sloping rumps and very good udder inheritance. Stan inherits the top combination of beta-casein A2A2 and kappa-casein BB and is well suited for heifer inseminations.
