SHV Paradox P

PARADOX P is a son of Picard from an excellent Foreman daughter and goes back to the proven bull mother Aija Supersire Makea in the dam line. Paradox P's strength lies in very good performance inheritance, which he combines with excellent daughter fertility and very high health values. Paradox P also inherits more strength than size and a BCS of 111. With an RZRobot of 117 and the matching teat length and placement, as well as perfect udder balance, Paradox P is particularly suitable for robot farms.

Linear

Merkmal	ZW	Tendenz	88	112	124	Tendenz
Stature	103	small				tall
Rip structure	115	tight rib				open rib
Body depth	87	shallow				deep
Strength	105	frail				strong
Rump angle	93	high pins				sloped
Thurl width	103	narrow				wide
Rear legs side view	92	posty				sickled
Foot angle	112	flat				steep
Hock quality	106	coarse				dry
Rear legs rear view	114	hocked in				parallel
Front feet orientation	97	hocked in				parallel
Locomotion	113	poor				good
Rear udder height	116	deep				high
Udder cleft	101	weak				strong
