DM Cord

DM Cord is an attractive comeback son out of the high performing and in various international systems highly tested Radar daughter DM Hola VG-86, which goes back to the proven cow family of Whittier-Farms Emery Cin VG-87 via the bull dam Blumenfeld Skywalker 6646. Cord is the only available sire with at least 148 RZG and 133 RZE. Cord passes on extremely high components with slightly above-average production and also impresses with very good fitness values with high longevity, very good udder health, high persistency and positive feed efficiency. In addition to very good fertility, a very high value for metabolic stability, which is so important for longevity, stands out in the health values. Furthermore, Cord convinces with an excellent and very balanced conformation with very good feet & legs and udder inheritance. Cord is also suitable for heifer inseminations.
