HEKTOR PP

Hektor PP is a homozygous polled sire from the very successful Mabelpoll cow family. The transmission profile of Hektor PP convinces with a good production with high components, positive fitness and health values, with good udder health and an excellent conformation with lots of dairy type, high, firmly attached udders that are good for robots and very functional feet and legs. Like his parents, Hektor PP tests very successfully in various international breeding value systems. With an RZRobot of 106, he is also suitable for AMS farms and has the top combination of beta-casein A2A2 and kappa-casein BB.
