BHA Glamour Red

Glamour Red comes from the Bentele breeding farm in Ravensburg, and his daughters confirm the high expectations and position him as one of the highest daughter-tested performance sires in the country. Glamour impresses with a very complete hereditary profile, with excellent performance, high content and outstanding persistence. His performance, combined with very good daughter fertility, high health values and a good useful life, make him a high achiever for economic milk production. Glamour also impresses with a balanced profile in terms of conformation and is very well suited for heifers due to easy calving. As one of only two Goliat sons worldwide, he also plays a special role in terms of pedigree and is suitable for many matings. With 129 RZÖko, he is also recommended for organic farms. Glamour is also an excellent inseminator.
