NO-PE Diskus

With 2.944, DISKUS is one of the highest GTPI sons of KAX Gladius - even in the economically more important NM\$ he is at a remarkable level with 1.008. In the maternal line Diskus goes back to the cow family of Regancrest Durham Barbie (specifically to the full sister Durham Bliss). The transmission profile shows Diskus as a very high production sire who combines high milk yield with good positive components. The health values are consistently positive and we can expect metabolically stable offspring with a long productive life, good udder health and low cell counts (with average milking speed). The course of the birth is average. Diskus offspring will be of average size and slow maturing. The parallel rear legs have high heels and a steeper angle in the hock. Udders are well attached and we expect teat length and placement suitable for robot milking.

Linear

	ZW	-2	2	
Stature	0.11	small		tall
Dairy character	0.07	tight rib		open rib
Body depth	-0.48	shallow		deep
Strength	-0.32	frail		strong
Rump angle	0.25	high pins		sloped
Thurl width	-0.7	narrow		wide
Rear legs side view	-2.41	posty		sickled
Foot angle	1.25	flat		steep
Rear legs rear view	0.84	hocked in		parallel
Rear udder height	1.19	deep		high
Udder cleft	0.05	weak		strong
Front teat placement	0.56	wide		close
Rear teat placement	0.86	wide		close
Fore udder attachment	1.41	loose		strong
Udder depth	1.04	deep		high
Teat length	-0.12	short		long
