NO-PE Diskus

With 2.923, DISKUS is one of the highest GTPI sons of KAX Gladius - even in the economically more important NM\$ he is at a remarkable level with 1.008. In the maternal line Diskus goes back to the cow family of Regancrest Durham Barbie (specifically to the full sister Durham Bliss). The transmission profile shows Diskus as a very high production sire who combines high milk yield with good positive components. The health values are consistently positive and we can expect metabolically stable offspring with a long productive life, good udder health and low cell counts (with average milking speed). The course of the birth is average. Diskus offspring will be of average size and slow maturing. The parallel rear legs have high heels and a steeper angle in the hock. Udders are well attached and we expect teat length and placement suitable for robot milking.

Linear

	ZW	-2	2
Stature	-0.25	small	tall
Dairy character	-0.38	tight rib	open rib
Body depth	-0.53	shallow	deep
Strength	-0.38	frail	strong
Rump angle	0.22	high pins	sloped
Thurl width	-0.96	narrow	wide
Rear legs side view	-2.38	posty	sickled
Foot angle	0.93	flat	steep
Rear legs rear view	0.64	hocked in	parallel
Rear udder height	0.06	deep	high
Udder cleft	-0.19	weak	strong
Front teat placement	0.22	wide	close
Rear teat placement	0.41	wide	close
Fore udder attachment	0.39	loose	strong
Udder depth	0.37	deep	high
Teat length	0.07	short	long
